

Truck-Mount VMS

Full-Matrix Variable Message Signs

New design is brighter and more legible, and more energy-efficient

- Full-matrix message signs available in two sizes
- Multiple fonts and graphics
- Touchscreen controller with intuitive interface
- Travel height under 12 inches

Wanco's new truck-mount variable message signs feature high-efficiency LEDs for reduced energy consumption, superior performance and outstanding legibility.

The full-matrix display can present messages as text, graphics or a combination of both, for mobile applications such as road striping convoys, pothole repairs, snow removal, road sweeping convoys and crash cushion (TMA) trucks.

For ease of use, these signs use our touchscreen controller with full-color interface. The controller is installed inside the cab and always shows the message displayed on the sign.

Wanco truck-mount signs are also versatile and dependable. Our new design has been vibration tested to the equivalent of more than 100,000 miles.

An integral low-profile tilt frame, operated from inside the cab, lowers the sign from vertical to horizontal when not in use. In travel position, the sign and frame are just 12 inches in height.
